# PATHFINDER

## PATHOLOGY

SLRC

## INTRODUCTION

A pathfinder is a guide to the literature and resources in a particular subject area. It is a subject oriented research guide designed to encourage researchers a self-directed use of the library.

The Reference/Periodical Section provides pathfinders basically to support students and faculty in their search for recorded literature and resources available at the S.H.L. Learning Resource and accessible on the Net.

This pathfinder on **PATHOLOGY** consists of 24 titles of books; 6 titles of CDs/DVD's; 7 titles of theses; 12 titles of Printed Journals; and 24 e-journals from online databases Academic OneFile.

Should you have comments or suggestions on this pathfinder, please call us at 723-07-06 local 113/114 or send message to [lpuslrc\\_main@yahoo.com](mailto:lpuslrc_main@yahoo.com)

## **PATHOLOGY**

Scope note and definition:

**Pathology** is the medical specialty concerned with the study of the nature and causes of diseases. It underpins every aspect of medicine, from diagnostic testing and monitoring of chronic diseases to cutting-edge genetic research and blood transfusion technologies. Pathology is integral to the diagnosis of every cancer.

**Pathology** plays a vital role across all facets of medicine throughout our lives, from pre-conception to post mortem. In fact it has been said that “Medicine IS Pathology”.
