# PATHFINDER

WEBPAGE and WEBSITE DEVELOPMENT

SLRC

## INTRODUCTION

A pathfinder is a guide to the literature and resources in a particular subject area. It is a subject oriented research guide designed to encourage researchers a self-directed use of the library.

The Reference/Periodical Section provides pathfinders basically to support students and faculty in their search for recorded literature and resources available at the S.H.L. Learning Resource and accessible on the Net.

This pathfinder on **WEBPAGE/WEBSITE DEVELOPMENT** consists of 4 titles of books; 11 titles of CD'S/DVD's; 24 titles of theses; 22 titles of printed Jjournals; and 47 e-journals from online databases Academic OneFile.

Should you have comments or suggestions on this pathfinder, please call us at 723-07-06 local 113/114 or send message to lpuslrc\_main@yahoo.com

## WEBPAGE/WEBSITE DEVELOPMENT

Scope note and definition:

**Website** A set of interconnected webpages, usually including a homepage, generally located on the same server, and prepared and maintained as a collection of information by a person, group, or organization.

**Usage Note:** The transition from *World Wide Web site* to *Web site* to *website* as a single uncapitalized word mirrors the development of other technological expressions which have tended to take unhyphenated forms as they become more familiar. Thus *email* is gaining ground over the forms *E-mail* and *e-mail*, especially in texts that are more technologically oriented. Similarly, there is an increasing preference for closed forms like *homepage*, *online*, and *printout*.
